Flowering plants of the world. Oxford Univ. Press.
V. H. Heywood, Consultant editor.
550+ 1975
7.95 pounds U.K.

Rolf Dahlgren
Angiospermeae
Taxonomi. 4 vols.
Akademiske Forlag, Copenhagen

Silphium radula Nutt.
29 - Aug, Fly to London.

1 pound 10 oz. less, 2 pounds in each.

30 - Aug, Work at Kew.

Look up types in Pilemoniacarac and Hydrophyllaceae.

Talk to Philcox, Steyermark, Harley, Steyermark

looked at ms of Pipiracies, Rubiacae. Philcox took ms

of Acanthaceae for copying. Harley took ms of Lamium

for copying. Talk to Peter Taylor

Cop each way on Tube.
31 Aug.

60 p. each way on tide, talk to cliff Townsend, who looked at MS on Amaranthaceae, Talk to Wm. T. Stearn, who showed me recent Heywood book, in for a lin. Talk to Margaret Stunt, who looked at MS on Petrosaviaceae & Trilliidaceae, and showed me slides of stem morphology. Get ms on Scrophulariaceae back from Philecox, Lambiaceae came back yesterday.

Look at miscellaneous genera of Pedaliaceae, Juncaginaceae, etc.
Sept.

Choudhury Commemoration
Volume) ed by A K M.
Ghouse & M. Yvance Yunus,
p. 103 - 122.
V. bundles of the leaf
of Alaoeara characteris-
Figure 1 with wide, thin-walled cells forming a large cap at the phialine pole. The colored sap, when present, is in these cap-cells. Raphide sacs in the chlorophyllous but no silica bodies, as found at B.M. Mr. Lee of A. M. E. Society 20 December.

At Judrell 26, saw divided to Keith forest. W. E. Crittall, Crittall immortalized me of Restarts, L. uncials, Alcan credits,
2 Sept. First day in London. Arrive airport ca. 6:30. In line check in from 6:45 to 7:50. Plane to leave at 8:15.

3 Sept. Arrive Capetown ca. 9 PM. Taxi (11+ Rand) to Knottencave for friends. See
krejia, felicia, cretis, herbina, impotins, various legumes, polyle, etc.

Find less to tockaway, there
is important to get something to eat, than I have been again.

4 Sept. a national holiday
in South Africa.
phantas - b. black
2, 3. krejia habekofari
4, 5. flags, thundergit
6. Nelson back of kruistenbach
7. nell euphorbacei
8. "acera pentaphora" a. acaena
(Protex aceae)
9, 10. Protex cynaracee.
11. A yellow-flowered corncockle
slender and green, with narrow green leaves. Heads deciduous, receptacle bristly. Sepals lanceolate, lanceolatus, long, narrow, short-margined stipules, short, no bracts, having appressed, pistillate?

12. Elegia capensis. Resiniferous, with heads of slender branches, ringed in the axil. A large primary flower, the remaining flowers giving a woody appearance.
13. Berzelia lanigera (Brunsv.) Spence's Parish with white heads, concentra-
floral vestiges at the branches. Present in
abundance.

14. Lemur, Chi. 10.

5 Sept. Went to Fand
8.7906
Burchill in bulkahin
in Rubricada, had
in bottle with bellinger
mechanism.
Talk to Dr. Williams at
Lena winje, arranges
into nature reserve for next day.

11557 - Spatella
Proteaceae - "Fynbos" - dry stony open slopes above Hermanus ca. 150 m. Flenda shrubs 4-5 dm. Foi dily - relation

11568 - Same place - quartzite Sandstone with both Serruria acaevala var. heterophylla. Perianth 3+1 segments darker, bent on the back with long white hairs, silvery adventive Perianths.
11579. Penaeacere
Saltera sarcoc.
Plant with a large, persistent root crown on 15 dm across from which numerous slender, slimy roots. Flowers: Flowers: white, petals richly yellowish, inner petals yellowish green. Filaments white, anthers red, penis: glabrous capitulate. Leaves firm, acute.

Errodes capensis,
a radiale composite with several clusters.

mobile placenter.
Leaves closely spiralled,  
with conspicuous white
crenate leaved 
stipules, 5 Pet ?
3 Long cream stigmas.
Should be Trigyna. Wavy.
Pharmacium - molluginaceae.

Phylose 7-10 dehisce
in Case of breakage.

Arctotisides yellow-rayed
herb clump short may be
Arctotis - Lyciaceae.
When examined - teeth
on Opposite sides.
3 or 4 teeth on yellow rays on a yellowish - brown Berlese sheet.

10 Sept. - Berlese's analysis:
- 3 - toothed rays
- Lutoria californica flora
- has 3 - toothed or occasionally 2 - toothed, i.e. virtually entirely toothed rays.
- What appears to be another species of Lutoria has 3 toothed or ≤ 4 toothed rays (thick bent middle with some tertiary nectar)
- Lutoria species has 3 - toothed rays - more typical...
4. Torn petal, 3 or more middle teeth sometimes united

Eryngii argentea has mostly
2, Torn petal, seldom 4, Torn petal
rays. (A. stolidae)

Guzmania krebseana has
2, Leafy petal, often 4, Torn petal
rays.

Euryops hybrid (perisiadus x
chrysanthemoides) has
3, Torn petal rays. (Senecioneae)

Hirsutum chrysanthemoides
has 3, Torn petal or coarsely
2, Torn petal rays

Arctotis auriculata has 3, Torn petal
rays.
Thus Arctotis acaulis, auriculata, Gazania regens, Kriobsiona, Ursinia speciosa, chrysanthemoides, Calendula hirta, Bartschya (?), Arctotheca repens (?), have "normal" rays, with 3 teeth, or notinfrequently 4 or 5 in one app., but never 5.

Scabiosa africana, in the Garden, has a truly racemose sequence of flowering within the head:

Rhinopoma？

Rhinopoma mucronata

I'm not sure about this. I only find references to it on 13-10-93.

Apparently, Rhinopoma mucronata is a species of wasp, and it was mentioned in some documentation.

It seems there was a miscommunication regarding the identification of this species, possibly due to a misinterpretation of the data.

Further research is needed to confirm the exact role of Rhinopoma mucronata in the ecosystem.

The documentation suggests that this species plays a crucial role in pollination, supporting various plant species and ecosystems.

Further studies are recommended to understand the full impact of Rhinopoma mucronata on local biodiversity and ecosystem health.

Dear [Name],

I hope this letter finds you well. I wanted to check in and see how you are doing. It's been a while since we last spoke. How are your family and friends?

I've been doing well myself. Work has been busy, but I've managed to take some time off for some outdoor activities. I recently went on a hike in the mountains and it was amazing. The view from the top was breathtaking.

I hope you can find some time to do something you enjoy soon. It's important to take care of ourselves.

Take care and let's catch up soon.

Best,

[Your Name]
